

2025 – 2026 Client Assurance Plan Statement

Inspectahire Instrument Company Ltd.'s Assurance plan supports good practices in the implementation of an assurance framework for the prevention of major accidents and lost time, promotion of wellbeing and improvement of organisational safety culture.

Company operations aim to assist our clients in a variety of industries and help address regulator concerns by a commitment to ongoing assurance activities, implementation of effective systems, promoting and sharing good practices.

As an SME the Assurance Plan is informal but absorbs the company's integrated approach to QHSE, with risk based thinking and continual improvement at its core.

The assurance framework is the implementation of a systematic and risk-based process for the auditing, monitoring and review of the suitability and effectiveness of risk management processes for company operations. The company has a selection of measures including site safety audits, planned general inspections, toolbox talks, HSE Meetings, membership of independent safety assurance schemes and an ever evolving training regime to ensure our team operate to the newest and safest standards.

Any client who wishes more information on any specific element of our Assurance Plan or integrated QHSE system is welcome to liaise with the Quality Assurance Manager.
